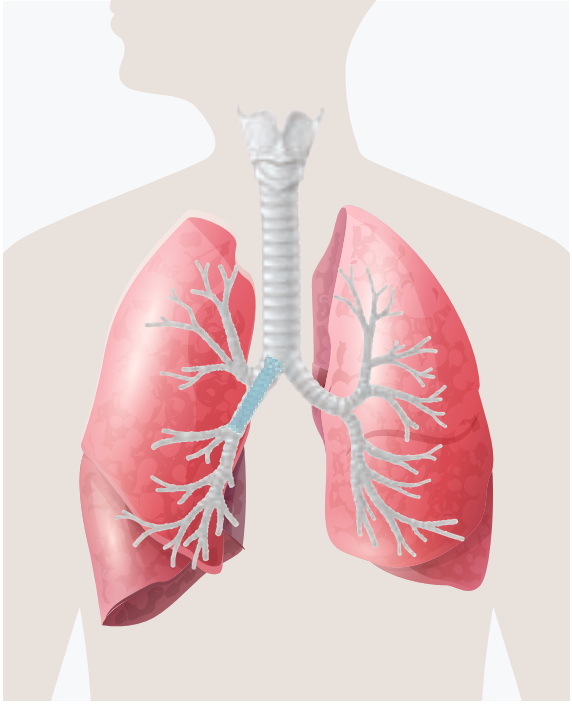
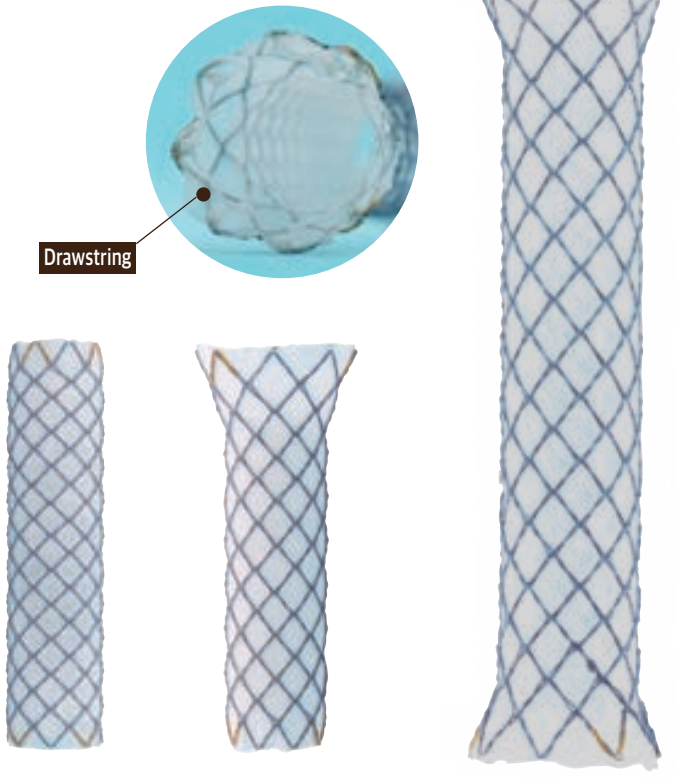
EGIS Bronchial Stent

Features & Benefits

- **High radial force**
  Provides rapid relief for patient's symptoms.
- **A variety of configurations - One Side Flared, Both Sides Flared, Straight**
  Allows customization for different tumor positions and anatomical configurations.
- **Drawstring for removal**
  Attached at the proximal stent end, it facilitates atraumatic stent removal.
- **Biocompatible silicone membrane**
  Inert, biocompatible and durable, the membrane increases stent patency.
- **Anti-migration**
  The flared configuration reduces migration, often perceived as problem with covered stents.





Specification

Order No. First two** : Diameter(mm) / Last two** : Length(cm)

Type	Order No.	Stent		Delivery system	
		Diameter(mm)	Length(cm)	Diameter(Fr)	Length(cm)
Straight	AW-8-**	8	4,5,6,7,8,9	15	70
	AW-**-**	10,12,14	3,4,5,6,7,8,9		
Single Flared	ASFK****07		3,4,5,6		
Double Flared	**ADFK****07**
